

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + Make non-commercial use of the files We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + Maintain attribution The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

#### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at http://books.google.com/

# HEALTH OFFICE.

PHILADELPHIA, February, 1887.

To the Select and Common Councils of the City of Philadelphia.

GENTLEMEN:—In obedience to law, I have the honor to present you my Annual Report of the Registration of Births, Marriages, and Deaths, which have occurred in the City during the year eighteen hundred and eighty-six.

With high respect,

Your obedient servant,

M. VEALE,

Health Officer.

# HEALTH OFFICER'S ANNUAL REPORT

OF

# BIRTHS, MARRIAGES, AND DEATHS.

1886.

#### REGISTRATION DEPARTMENT,

HEALTH OFFICE, Philadelphia, January, 1887.

To the President and Members of the Board of Health.

GENTLEMEN:—In accordance with the Act of Assembly, approved March 8, 1860, the following abstract of births, marriages, and deaths is respectfully presented through you to the City Councils for the year ending December 31, 1886.

The number of births registered during the year amounted to twenty-three thousand two hundred and twenty-one (23,221), and increase over the previous year of five hundred and sixty-five (565). The number of marriages were six thousand two hundred and fifteen (6,215), a decrease from the previous year of one thousand four hundred and sixty-one (1,461). The deaths amounted to twenty thousand and five (20,005), a decrease of one thousand three hundred and eighty-seven (1,387).

The following table shows the ratio of deaths, with population, for the past twenty-six years:

| Years. | Population.     | Deaths. | Deaths to<br>1,000 persons<br>living. | Persons<br>living to<br>one death |
|--------|-----------------|---------|---------------------------------------|-----------------------------------|
| 1861   | 576,408         | 13,540  | 23.49                                 | 42.57                             |
| 1862   | 587,287         | 13,864  | 28.60                                 | 42.36                             |
| 1863   | 598,166         | 14,220  | 28.73                                 | 42.06                             |
| 1864   | 608,045         | 15,875  | 26.10                                 | 38.80                             |
| 1865   | 618,924         | 15,633  | 25.25                                 | 89.59                             |
| 1866   | 620,803         | 15,862  | 22.80                                 | 40,99                             |
| 1867   | 640,682         | 12,660  | 19.76                                 | <b>50.6</b> 0                     |
| 1868   | 651,561         | 13,391  | 20.39                                 | 48.65                             |
| 1869   | 662,440         | 13,428  | 20.27                                 | 49.33                             |

The mortality of adults amounted to eleven thousand and thirteen (11,013), a decrease from the previous year of three hundred and nine (309), and the mortality of children eight thousand nine hundred and ninety-two (8,992), a decrease from the previous year of one thousand and seventy-eight (1,078).

The number born in the United States was fourteen thousand six hundred and seventy-two (14,672). Four thousand five hundred and thirty-two (4,532) were of foreign birth, and eight hundred and one (801) whose nationalities were unknown.

Abscess.—The number of deaths so reported amounted to ninety (90), a decrease from the previous year of fourteen (14); sixty-five (65) were adults, and twenty-five (25) were children.

Cancer.—The number of deaths amounted to four hundred and fifty-six (456), a decrease from the previous year of thirty-one (31); see Table VIII for classification.

Cerebro-Spinal Meningitis.—The number of deaths so reported amounted to seventy-five (75), a decrease from the previous year of twelve (12); fourteen (14) were adults and sixty-one (61) were children; forty-three (43) were males, and thirty-two (32) females: twenty-nine (29) were under five years of age.

Consumption of the Lungs.—The number of deaths amounted to twenty-eight hundred and thirty-four (2,834), an increase over the previous year of thirteen (13); twenty-four hundred and eighty-five (2,485) were adults, and three hundred and forty-nine (349) were children; eighteen hundred and sixty-nine (1,869) were natives of the United States, seven hundred and sixty (760) were of foreign birth, and two hundred and five (205) whose nativity was unknown.

The deaths in each month of the year were as follows:

| January  | <b>22</b> 8 | July      | 180 |
|----------|-------------|-----------|-----|
| February | 218         | August    | 249 |
| March    |             | September | 176 |
| April    | 244         | October   |     |
| May      | 286         | November  | 223 |
| June     |             | December  | 283 |

The largest number of deaths occurred in the month of March,—three hundred and twenty-seven (327),—and the smallest number in the month of September,—one hundred and seventy-six (176).

| 236.1       | month | in each | disease | this | from | deaths | average | The |

Fever, Scarlet.—The number of deaths amounted to two hundred and forty-eight (248), a decrease from the previous year of one hundred and twenty-seven (127).

The deaths in each month of the year were as follows:

| January  | · 25 | July      | 19 |
|----------|------|-----------|----|
| February | 20   | August    | 10 |
| March    |      | September | 5  |
| April    | 85   | October   |    |
| _        |      | November  |    |
| •        |      | December  |    |

Hooping Cough.—The number of deaths so reported amounted to eighty-five (85), a decrease from the previous year of forty-seven (47).

Hydrophobia.—The following figures show the deaths from the above disease since 1860:

| 1860 | - 1 | 1874 | 8 |
|------|-----|------|---|
| 1861 | 1   | 1875 | 2 |
| 1862 | 4   | 1876 | 4 |
| 1863 |     | 1877 | 4 |
| 1864 | 3   | 1878 |   |
| 1865 | 2   | 1879 |   |
|      | 2   | 1880 | 1 |

| 1868 | ••  | 1882 | 2 |
| 1869 |     | 1883 |   |
| 1870 | -   | 1884 |   |
| 1871 |     | 1885 |   |
| 1872 | _   | 1886 |   |
| 1873 |     |      |   |

Inflammation of Lungs.—The number of deaths amounted to one thousand four hundred and fifty-six (1,456), a decrease from the previous year of sixty-three (63); eight hundred and thirteen (813) were adults, and six hundred and forty-three were children; seven hundred and forty-two (742) were males and seven hundred and fourteen (714) were females.

Old Age.—Seven hundred and fifty-three (753) persons died of old age, of whom two hundred and seventy-nine (279) were between the age of seventy and eighty; three hundred and fifty-five (355) between the age of eighty and ninety; one hundred and two (102) between ninety and one hundred; six (6) between one hundred and one hundred and ten; and one (1) between one hundred and ten and one hundred and twenty.

Poisoning.—The number of deaths from accidental poisoning amounted to twenty-three (23), seven (7) less than those of the previous year.

| Poisoning     | 1 | Lead       | 4 |
|---------------|---|------------|---|
|               |   | Morphia    |   |
| Carbolic Acid | 1 | Narcotic   | 2 |
| Chloral       | 3 | Opium      | 1 |
|               |   | Strychnine |   |

Small Pox.—The number of deaths from this loathsome disease amounted to four (4); they occurred in the months of November and December. The first death to occur in the city in sixteen months was that of a boy who came here from Brooklyn, N. Y., with the disease well developed upon him.

Suicide.—The number of deaths amounted to ninety (90), an increase over the previous year of twelve (12), of whom seventy-six (76) were males and fourteen (14) females; they were classified as follows:

| Suicide             | 1  | Muriatic Acid  | 1 |
|---------------------|----|----------------|---|
| Arsenic             | 7  | Opium          | 1 |
| Carbolic Acid       | 1  | Paris Green    | 1 |
| Corrosive Sublimate | 1  | Poison         | 1 |
| Cutting Throat      | 10 | Railroad       | 1 |
| Drowning            |    | Rough on Rats  | 2 |
| Hanging             |    | Shooting       |   |
| Laudanum            |    | Stabbing       |   |
| Jumping from Window | 4  | Sulphuric Acid |   |

Sun Stroke.—Of the nineteen (19) deaths so reported, fifteen were males and four (4) females, a decrease from the previous year of seventy-seven (77).

Tumor.—The deaths from this cause amounted to seventy-four (74), of which thirty-one (31) were males and forty-three (4) females; they were classified as follows:

| Back    | 1  | Neck          | 3  |
|---------|----|---------------|----|
| Bladder | 3  | Prostate      | 2  |
| Bowels  | 1  | Stomach       | 10 |
| Brain   | 16 | Thyroid Gland | 1  |
|         |    | Uterus        |    |
| •       |    | Abdominal     |    |
|         |    | Fibrous       |    |
|         |    | Malignant     |    |
|         |    | Ovaries.      |    |

| June             | 690         | . 637    | 697     | 680       | 1,327  |
| July             | 877         | 898      | 726     | 1,044     | 1,770  |
| August           | 989         | 919      | 962     | 946       | 1,908  |
| September        | <b>72</b> 0 | 687      | 746     | 661       | 1,407  |
| October          | 728         | 704      | 805     | 627       | 1,482  |
| November         | 798         | 716      | 848     | 671       | 1,514  |
| December         | 1,032       | 1,002    | 1,203   | 831       | 2,084  |
|                  | 10,160      | 9,845    | 11,013  | 8,992     | 20,005 |

The largest mortality occurred in the month of March, two thousand one hundred and eighty-four (2,184), and the lowest in the month of June, one thousand three hundred and twenty-seven (1,327). The excess of males over females was three hundred and fifteen (315), and adults over children, two thousand and twenty-one (2,021).

## TABLE XIII.—DEATHS IN EACH WARD.

(Still-births not included.)

The following table of mortality in each ward, with population (according to the Tenth Census), with ratio of deaths to population, and the percentage of deaths in each ward to the total mortality.

| Wards.         | Population<br>Tenth<br>Census. | Area in square miles, | Deaths.     | Deaths to population. | Percentage<br>of deaths<br>to total<br>mortality. |
|----------------|--------------------------------|-----------------------|-------------|-----------------------|---|

The surface of the mercury in the cistern of Barometer is 117 feet above the mean level of the sea. Barometer corrected for temperature, elevation above sea, and instrumental error.
All observations are taken in 75 meridian time.
• Inappreciable.

The surface of the mercury in the cistern of Barometer is 117 feet above the mean level of the sea. Barometer corrected for temperature, elevation above sea, and instrumental error.

All observations are taken in 75 meridian time.

<sup>•</sup> Inappreciable.

The surface of the mercury in the cistern of Barometer is 117 feet above the mean level of the sea. Enronneter corrected for temperature, elevation above sea, and instrumental error.

All observations are taken in 75 meridian time.

\* 25 to 89 miles per-hour.

† 15 to 24 miles per hour.

102 Week Ending Saturday, March 13, 1886.

The surface of the mercury in the cistern of Barometer is 117 feet above the mean level of the sea.

Barometer corrected for temperature, elevation above sea, and instrumental error.

All observations are taken in 75 meridian time.

\* Inappreciable.

The surface of the mercury in the cistern of Barometer is 117 feet above the mean level of the sea.

Barometer corrected for temperature, elevation above sea, and instrumental error. All observations are taken in 75 meridian time.

\* Inappreciable.

The surface of the mercury in the cistern of Barometer is 117 feet above the mean level of the sea. Barometer corrected for temperature, elevation above sea, and instrumental error.

All observations are taken in 75 meridian time.

Inappreciable.

| Totals.        | 387,738          | 173,084    | 457,777        |

The above statement shows a summary of all returns of births, marriages, and deaths made to this Department since the Act became operative, July 1, 1860. Since the year 1875, still-births, premature births, and bodies brought to the city from other localities have not been included, thus showing since that year the actual deaths in the city.

Respectfully submitted,

M. VEALE,

Health Officer.

Attest:

GEO. E. CHAMBERS,

Registrar.

#### HEALTH OFFICE.

Philadelphia, January 4, 1887.

To the President and Members of the Board of Health.

GENTLEMEN:—I have the honor to present the following report of the work of the Nuisance Inspectors for the year ending December 31, 1887:

| The whole number of nuisances examined was |       | •            |
|--|-------|--------------|
| Number dismissed                           |       | 2,663        |
| Nuisances declared and notified            |       | 9,894        |
| Referred to other departments              | 285   | •            |
| Removed by Health Officer without notice   | 1,235 |              |
| Returned as abated by owners               |       |              |
| Returned not complied with                 | 1,706 | 9,731        |
| Pending action of owners                   |       | 9,731<br>163 |

The above nuisances and causes thereof involved the examination of 17,352 different properties; the service of notice upon 9,413 different owners or agents, and 17,500 visits, not including examinations made by your chief inspector, nor the service of notice and bills upon parties residing at places other than where nuisances existed. Bills served, 2,007.

The causes of complaint were:

| Privy wells, full, foul, and leaky | 5.039  |
|------------------------------------|--------|
| Water-closets, defective           | 310    |
| Underdrains, hydrants, and pipes   |        |
| Water and filth in cellars         | 1.873  |
| Houses and rooms filthy            | 119    |
| Defective surface drainage         | 936    |
| Yards, courts, and alleys filthy   | 917    |
| Miscellaneous nuisances            | 2,326  |
|                                    |        |
| Total                              | 19 557 |

Among the privy wells examined there were found leaking and overflowing 575.

The bills served by inspectors show that there were cleaned by order of the Health Officer 359 privy wells, from which was taken 68,657 cubic feet of filth. This is an average of 191. cubic feet per well (and a fraction over).

There were also cleaned by other parties 3,109 wells; taking the same average as those cleaned by the Health Officer (which is low), there has been removed a total of 662,476 cubic feet of filth from 3,468 wells.

In addition to the foregoing there has been received and forwarded direct to the Department of Highways some 1,700 complaints relative to garbage, ashes, streets, and inlets.

So numerous and so bitter had become these complaints that it was deemed unjust to this department that so many citizens should hold it responsible for that over which it had no control. And upwards of five hundred of these complaints have been answered by postal since July, 1886, as follows: "Your complaint against garbage collector has been forwarded to the Chief Commissioner of Highways, to whom all such should be made, as this department has no control over that matter." This has caused a falling off of such complaints at this office, but the end is not yet.

There has also been received and consigned to the waste basket upwards of 1,500 anonymous communications.

| With the leaking and overflowing wells        | 575   |
|---|-------|
| Might well be added the defective drains, etc | 1,037 |
| Water and filth in cellars                    | 1,873 |
| Defective surface drainage                    | 936   |
| And we have of soil polluting nuisances       | 4,421 |

And when we consider that the great bulk of this pollution is above cellar level, then only can we realize the necessity for its prompt removal.

#### Respectfully submitted,

#### S. H. MARTIN,

Chief Inspector.

#### HEALTH OFFICE.

Philadelphia, January 4, 1886.

To the President and Members of the Board of Health.

GENTLEMEN:—I herewith submit the following report of the operations of this office for the seven months ending December 31, 1886:

The city is divided into six districts, viz.:

The First District, comprising the First, Second, Third, Fourth, Twenty-sixth, and Thirtieth Wards, having an area of 14.371 square miles.

The Second District, the Tenth, Thirteenth, Fourteenth, Fifteenth, and Twenty-second Wards, 20.014 square miles.

The Third District, the Fifth, Sixth, Eleventh, Twelfth, Sixteenth, Seventeenth, Eighteenth, and Twentieth Wards, 29.61 square miles.

The Fourth District, the Nineteenth, Twenty-third, Twenty-fifth, and Thirty-first Wards, 54.486 square miles.

The Fifth District, the Seventh, Eighth, Ninth, Twenty-

fourth, and Twenty-seventh Wards, 22.679 square miles.

The Sixth District, the Twenty-first, Twenty-eighth, and Twenty-ninth Wards, 14.872 square miles.

#### Plumbing and Drainage of Buildings.

| Plans submitted and approved   | 5,362<br>134   |
|--|----------------|
| Total plans submitted  | 5,496          |
| Buildings finally inspected and plans filed Buildings unfinished or waiting final inspection                                     | 3,259<br>2,237 |
| Total finished and unfinished buildings  | 5,496          |
| Number of inspection visits  | 18,209         |
| this department (some of which embrace whole blocks of houses)  Number of persons engaged in the plumbing business registered to | 137            |
| date   | <b>518</b>     |

The reports received from the Assistant Inspectors from time to time continue to show cases of defective workmanship, indicating either a lack of intelligence in not properly connecting their pipe systems, or a wilful disregard of the health of the occupants of houses. In these cases prompt action has been taken by the inspectors, and the delinquents compelled to comply with the rules and approved plans.

Respectfully submitted,

GEO. S. HUGHES,

Chief Inspector House Drainage Ven., etc.

Examined and approved January 4, 1887.

THAD. L. VANDERSLICE, JOS. G. PATTERSON.

Plumbing and House Drainage Committee.

Action of the Board that the Health Officer be requested to incorporate the main facts as contained in report in his annual report of 1886.

WM. P. TROTH, C. C.

### APPENDIX.

TO THE

# HEALTH OFFICER'S REPORT,

1886.
